

ICR Leasing use Engine Carbon Clean service for customer vehicles

“Customer service is our top priority and using the Engine Carbon Clean service on the wide range of fleet vehicles we manage, shows that we are always looking for ways to go that extra mile.”

Will Chapman,
ICR Leasing

ICR Leasing was initially approached to provide company vehicles to Engine Carbon Clean (ECC). Since then, ICR Leasing identified the potential for using the ECC service for their own customer vehicles and is now working in partnership with Engine Carbon Clean.

“ECC’s unique product and refreshing approach to business made it an easy decision for us when underwriting,” commented Will Chapman, Head of Operations, Sales and Marketing. “Since forming a solid partnership with ECC and seeing first-hand the benefits of the technology, ICR Leasing now uses the Engine Carbon Cleans service on our customer vehicles, including those leased to one of the best known airlines in the country.”

As well as carrying out an Engine Carbon Clean service on many of the ICR team’s own vehicles, a customer’s VW Transporter T26 Panel van was recently serviced and the feedback was fantastic: “It was like a 5 year old van was brand new again!”

ICR Leasing prides itself on working closely with customers to maximise the lease opportunities and provide reliable vehicles. Furthermore knowing its customers keep a tight watch over emissions and reducing their carbon footprint and are actively looking at ways to implement policies to achieve environmental targets, with Engine Carbon Clean’s help, its customers are on the way to achieving these.

Sheila Docker, Business Development Director at Engine Carbon Clean commented, “Working with ICR Leasing and their wide range of customer vehicles offers fantastic opportunities for both partners. It’s clear that ICR’s dedication to customer service and delivery of high quality lease vehicles sets them apart and with incorporating our ECC service into their vehicle fleet maintenance, ICR customers will benefit even further.”
