

Irohaul Haulage Reduces Fuel Costs and Improves Fleet Performance

IROHAUL LTD

“We have been extremely impressed not only with the professional service from Engine Carbon Clean, but also the immediate benefits to our vehicles. We have more power, all engines are running smoother and we’re experiencing a saving on our fuel bills.”

Tadgh O’Callaghan,
Owner

Irohaul Ltd are haulage specialists based in Mallow Co.Cork in the Republic of Ireland. They provide a nationwide delivery services across Ireland with an extensive range of machinery including a rigid flatbed with a hi-ab crane, curtain side trailers, flat trailers, bulk tipping trailers, bulk cement trailers and gas cylinder transportation.

Irohaul is proud of their fleet of 15 vehicles and they strive to provide a high quality level of service and a friendly, experienced workforce. In order to provide their customers with such a service, maintaining a reliable fleet to carry out customer contracts is vital.

Following discussions with their chief mechanic on how our service worked and the benefits experienced by our fleet customers on all types of vehicles, we were invited to their premises to carry out a full demonstration on one of their trucks.

With the benefits immediately obvious, we were asked to clean a further six vehicles which had a combined total of over 2.8 million miles on the clock:

- DAF CF 75.310
- Isuzu NQR
- Renault Midlum Dxi270
- DAF LF45.170
- MAN TGX 18.440
- Volvo FM 300

George Untea from Engine Carbon Clean Munster commented, “Many fleets have high mileage vehicles and this is where our service makes a real difference. Keeping the vehicles on the road to carry out their transport commitments whilst reducing maintenance and fuel costs are key objectives for any haulage business.”
